The Right Hardware for the Right Application

The Lydia[®] voice solution from topsystem has already been installed on a wide range of standard mobile computers with Microsoft Windows CE, Windows Embedded, Windows XP, or Windows 7. Even the employment of multiple different devices in one application is an option with Lydia[®].

This flexibility offers a tremendous advantage during integration, warranty and for future hardware updates.

Currently, topsystem has approved well over 50 different devices from various manufacturers.
