Microlistics

A GLOBAL PARTNER IN SUPPLY CHAIN SUCCESS

Microlistics is part of the WiseTech Global Group.

WiseTech Global is a leading developer and provider of software solutions to the logistics execution industry globally.

130
COUNTRIES[1]

7000+
CUSTOMERS[2]

1000+
EMPLOYEES

Microlistics' leading-edge software development, its deep domain knowledge of warehousing, rapid deployment, data analytics and reporting capabilities significantly improves customers' warehouse and business operations.

WAREHOUSING
MADE
SIMPLE

ELIMINATE WAREHOUSE ERRORS

System directed RF functionality means the operator no longer needs to make any important decisions, they simply folow the detailed instructions.

REDUCE OPERATIONAL COSTS

Eliminate staff downtime with system directed RF tasks to keep your operation moving. Microlistics ensures all warehouse staff are tracked and measured against your KPI's.

INCREASE STOCK ACCURACY

In-built cycle counting and stocktake functionality ensures your stock integrity is always maintained. Detailed information and stock attributes are able to be interrogated instantly.

INTEGRATE SYSTEMS & EQUIPMENT

A library of interfaces enables integration to any host system, ERP or Transport Management Software. Microlistics configure all WMS interface work in-house meaning system integration is deployed rapidly and costs are controlled.

FEATURES & MODULES

Microlistics WMS can be delivered with these extra modules and features.

3PL BILLING

Client Billing (Storage & Activity Charges), Activity Based Costing and Value-Added Services.

WEB PORTAL

Web access to enable the user to see reports, enter orders and view order status.
Suppliers can also produce their own ASN labels without system integration.
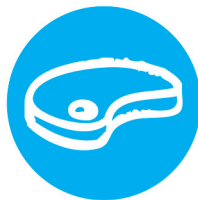

LABOR MANAGEMENT

Full Engineered Standards or a Work Estimator that uses past history and hours worked to advise management of hours remaining.

WEIGHT MANAGEMENT

Catchweight, Variable Weight and Random Weight requirements are included in Microlistics WMS.
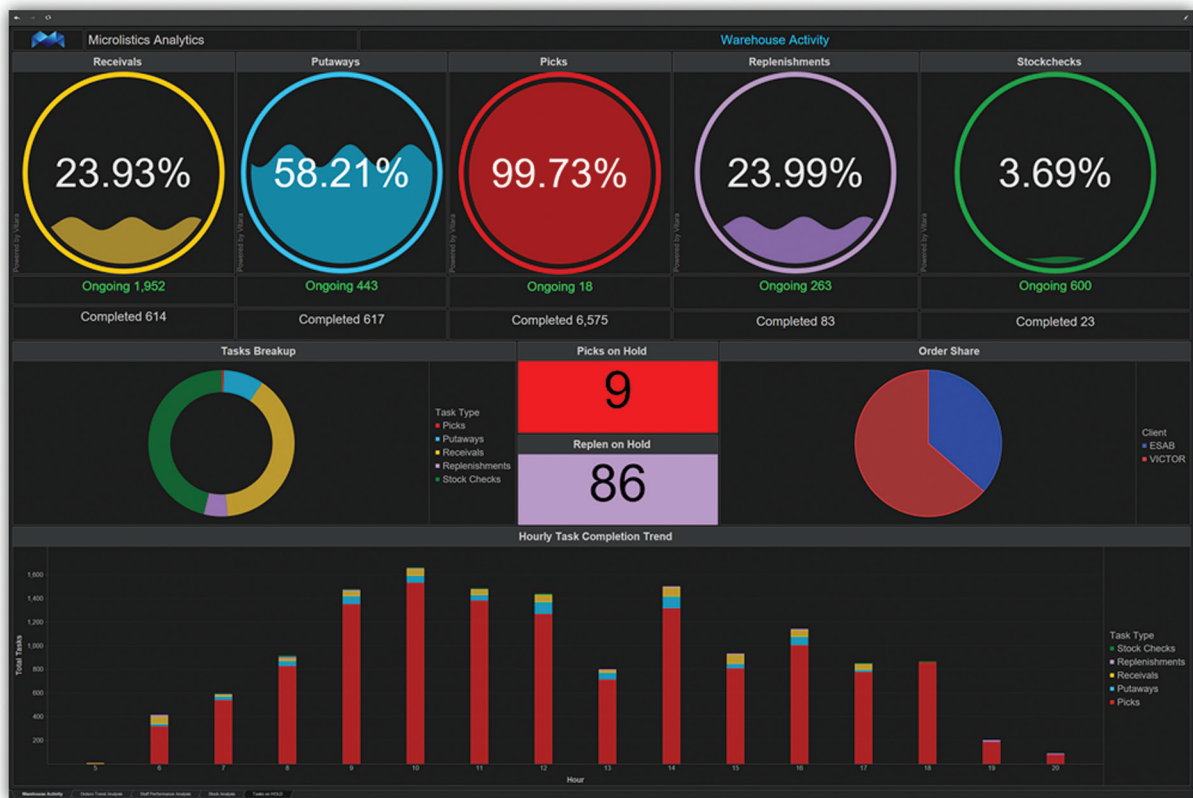

LOT & BATCH

Lot & Batch Tracking and many more Stock Attributes can be easily tracked in Microlistics WMS.

DATE MANAGEMENT

Use By, Best Before, Expiry Date, Shelf Life and Customer Shelf requirements are all easily tracked in Microlistics WMS.

REAL TIME REPORTING

The Microlistics Business Intelligence module is built on the Microstrategy Enterprise Analytics platform which results in a series of dashboards which enable a user the convenient way of tracking the warehouse operations in real time.

This provides the warehouse manager the data to optimize operations through real time decision making.
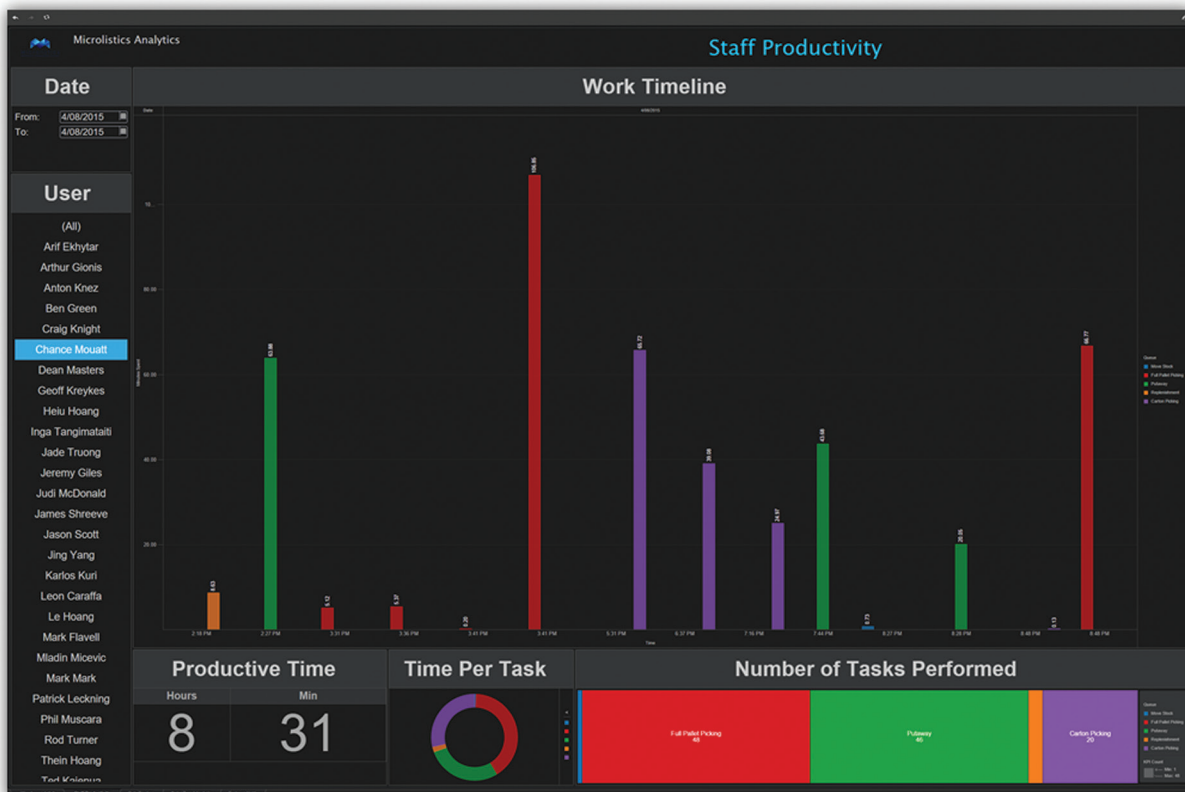

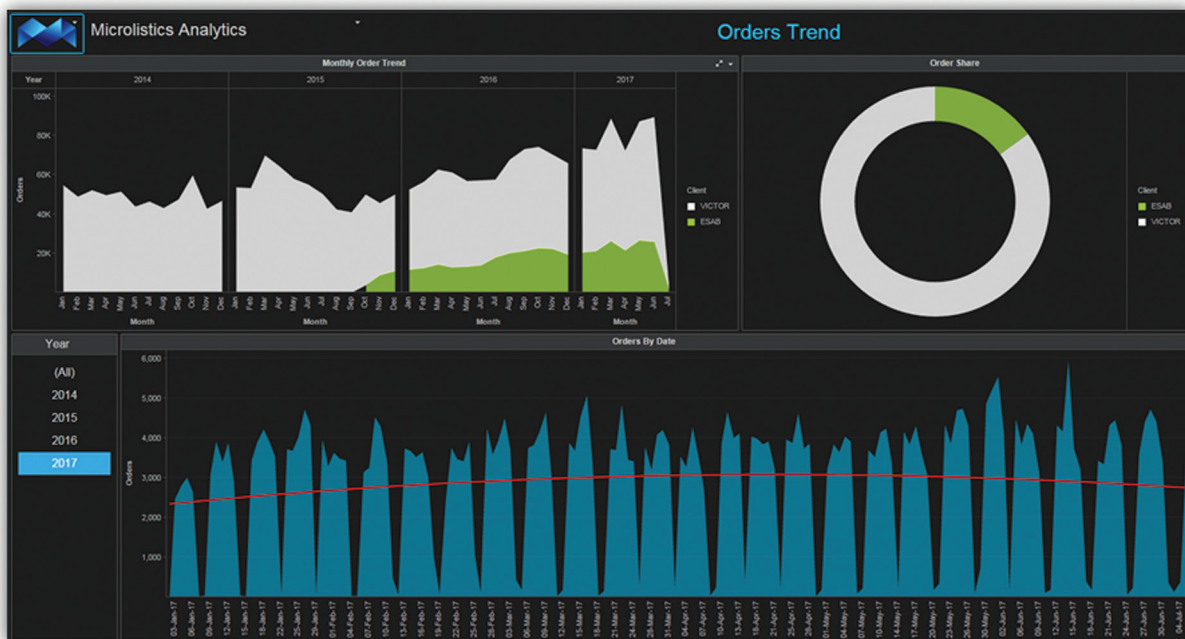

FEATURES & CAPABILITIES

Microlistics provides a standard set of dashboards as part of the module which is built over the custom Microstrategy schema (metadata layer) built on the Microlistics WMS. This enables the possibility of creating complex dashboards which can slice and dice data points across different attributes thus enabling actionable insights for the warehouse.

The rich capability of the Microlistics BI and Analytics module helps create easy to use, data rich dashboards and reports using the underlying robust data from Microlistics WMS – making it a powerful tool to access and track operational performance while working on improving warehouse efficiency. This analytics module is also configurable to suit individual business needs.
